Decision support tools that work in a rhythm with you

As hospitals grapple with workforce shortages, Philips Clinical Decision Support tools have never been more important to overburdened acute care teams. Our solutions are designed to help reduce cognitive load, support recognition of patient deterioration and give timely feedback on whether therapeutic interventions are working.

Unlock the full potential of your Philips IntelliVue monitoring platform

Horizon Trends

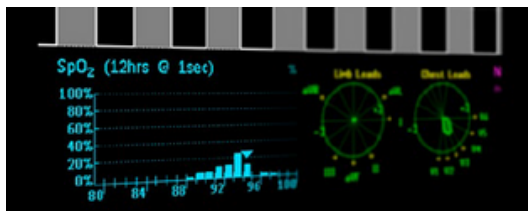

See deviations in vital signs at a glance

ST/STE Map

Visually interpret ST values and evaluate interventions

Histograms

Understand a patient's response to therapy over time
